Experiences

UX Design Generalist - Freelancer

Mar 2015 - Present

My Role depends on the client's project, and generally revolves around:

- Leading the design process to build and deliver a wide range of deliverables
- Performing user experience research, and empathizing with the users.
- Producing Design Systems and UI elements.
- Working with developers on the design integrations, design specifications, data and information architecture.
- Exploring alternative solutions for constraints and keeping the team focused on the users needs

UX/UI Designer - Contractor | UM6P

Jan 2021 - Mar 2021

Worked as a UX/UI Designer in the "SEP Project" for the UM6P and OCP Foundation, to create a platform that helps young students and graduates in Africa strengthen their skills and leadership by offering them guidance, mentorship, knowledge and broadening their opportunities

Operating Systems

Sep 2020 -- Google | Coursera

Android Developer

Apr 2018 -- Udacity | OMAC Dubai

About

As a designer with a background in IT, I was first drawn to UX by the way it combines empathy and creativity. It excites me to build a solution that users can interact with and find useful.

My strengths include building products that are accessible and universal.
